JUL 1983

CHARTER OF THE COMPUTER SECURITY WORKING GROUP

OF THE CIA INFORMATION SYSTEMS BOARD

-- Analyze the adequacy and compatibility of information system security policies, procedures, hardware and software, and information transfer criteria.

-- Suggest changes needed in computer security policies required to improve information services without sacrificing security or to enhance security.

-- Establish clear and enforceable standards for security in all present and future information systems.

25X1

-- Monitor interdirectorate computer security projects and tests

-- Serve as an interface between Agency components and Intelligence Community computer security groups, studies, and projects.
